

CONTROLLED SUBSTANCES SUPERVISOR'S USER MANUAL

Version 3.0

March 1997

Department of Veterans Affairs
Software Service
Clinical Ancillary Product Line

Preface

This software is continually being enhanced to provide additional options and capabilities. The CS Development Team encourages you to send to them questions and comments about the completeness and accuracy of this manual and suggestions for its improvement. Electronic mail messages can be sent to G.Controlled Substances Team@ISC-BIRM.

Supervisor's User Manual

Orientation

Within the terminal dialogues used as examples in this manual, the user's input is underlined and bolded. Whenever the Return/Enter key should be pressed, you will see the symbol <RET>. Whenever you see the underline and bold representing the user's input, you can assume the Return/Enter key was pressed.

Electronic Signature

In Controlled Substances, the Electronic Signature functionality will be used for identification for pharmacy personnel, nursing personnel, and narcotic inspectors.

Identification will be used to reconfirm the identity of the user at the keyboard before proceeding with the next step in a critical process.

In the documentation, when your Electronic Signature Code is to be entered, it is represented as XXXXXX.

If you have not previously been issued an Electronic Signature code you can assign yourself one at any menu option by entering TBOX and then choosing Edit Electronic Signature Code. You can also enter "EDIT E and follow the prompts as shown on the next page.

Electronic Signature Codes

This option is designed to permit you to enter or change your Initials, Signature Block Information and Office Phone number. In addition, you are permitted to enter a new Electronic Signature Code or to change an existing code.

INITIAL: JLD
SIGNATURE BLOCK PRINTED NAME: JANE L. DOE
SIGNATURE BLOCK TITLE: R.N.
OFFICE PHONE: 290-7101

ENTER NEW SIGNATURE CODE: XXXXXX(Signature Code will not appear on screen)

RE-ENTER SIGNATURE CODE FOR VERIFICATION: XXXXXX

DONE

TIP: It may help to use your access code as your Electronic Signature Code, this will help eliminate the possibility of forgetting it!

Intranet

We are now on the intranet, come visit us.

(http://www.vista.med.va.gov/softserv/clin_bro.ad/index.html) This address will take you to the Clinical Products page where you will find a listing of all the clinical software manuals and other software manuals. Click on the Controlled Substances (CS) link and it will take you to the CS Homepage. You can also get there by going straight to http://www.vista.med.va.gov/softserv/clin_nar.row/pharmcs/index.html. (don't forget to bookmark it!)

In addition, both of these homepages have a Software Service Homepage link. Simply click on this link and then follow the links to the manuals you would like to see.

Setting up the Controlled Substances package

STEP	STEP DESCRIPTION	MENU PATH	OPTION	PAGE(S)
1	The initial installation of this package will mark entries in your DRUG file based on the DEA SPECIAL HANDLING field. Print the DEA Special Handling List and compare it to the drugs currently tracked on your 2320's to see if you need to mark or unmark any drugs. If not, go to step 3.	Controlled Substances Menu: Supervisor (CS) Menu: Set Up CS (Build Files) Menu: Print CS Set Up Lists Option:	DEA Special Handling List	17
2	For a drug to be added to a Vault or Narcotic Area of use (NAOU) , it must be marked for Controlled Substances use.	Supervisor (CS) Menu: Set Up CS (Build Files) Menu: Enter/Edit Menu:	Mark/Unmark Drugs for Controlled Substances Use	7
3	Identify which Inpatient Site(s) should be selectable for Controlled Substances.	Supervisor (CS) Menu: Set Up CS (Build Files) Menu:	Site Parameters (requires PSD PARAM security key)	7
4	Decide how many Master and Satellite vault(s) you will need and then create them. Worksheet on page 13.	Supervisor (CS) Menu: Set Up CS (Build Files) Menu:	Create/Edit the Narcotic Area of Use (NAOU)	10

STEP	STEP DESCRIPTION	MENU PATH	OPTION	PAGE(S)
5	Define your NAOU Inventory types and descriptions.	Supervisor (CS) Menu: Set Up CS (Build Files) Menu: Enter/Edit Menu:	Inventory Types- Enter/Edit	7
6	Enter your drug location codes	Supervisor (CS) Menu: Set Up CS (Build files) Menu: Enter/Edit Menu:	Enter/Edit CS Drug Location Codes	7
7	Enter the drugs that are stocked in your Master Vault(s). A worksheet is available on page 15	Supervisor (CS) Menu: Set Up CS (Build Files) Menu: Enter/Edit Menu:	Stock CS Drugs- Enter/Edit	12
8	Create your NAOUs. A worksheet is available on page 13.	Supervisor (CS) Menu: Set Up CS (Build Files) Menu: Enter/Edit Menu:	Create/Edit the Narcotic Area of Use	10

STEP	STEP DESCRIPTION	MENU PATH	OPTION	PAGE(S)
9	Enter the drugs that are stocked by a typical NAOU into an NAOU to be used as a pattern. A worksheet is available on page 15.	Supervisor (CS) Menu: Set Up CS (Build Files) Menu: Enter/Edit Menu:	Stock CS Drugs- Enter/Edit	12
10	Transfer stock entries from your pattern NAOU to your other NAOUs.	Supervisor (CS) Menu: Set Up CS (Build Files) Menu: Transfer Stock Entries Menu:	NAOU to NAOU Transfer Stock Entries (This requires that PSD TRAN security key)	16
11	Add existing green sheets.	Supervisor (CS) Menu:	Add Existing Green Sheets at Setup	23
12	If you do not wish to use a bar code tracker to inventory your vault(s), proceed to step 13. Otherwise, print pharmacist ID labels.	Supervisor (CS) Menu:	Print Pharmacist ID Labels (This requires the PSDMGR security key)	25
13	Initialize balances in vault by using the 2320 or use inventory sheet. You may want to enter high on hand quantities while you bring up NAOUs a few at a time and then follow with balance adjustments for the vault when all NAOUs are active.	Supervisor's (CS) Menu:	Initialize Balance at Setup	18

Supervisor (CS) Menu

This option supports activities to build and maintain the files needed to operate the Controlled Substances module of the Pharmacy software.

The *Supervisor (CS) Menu* option is locked with the PSDMGR key and assigned to the pharmacy supervisor(s) maintaining the narcotic vaults.

Set Up CS (Build Files) Menu...

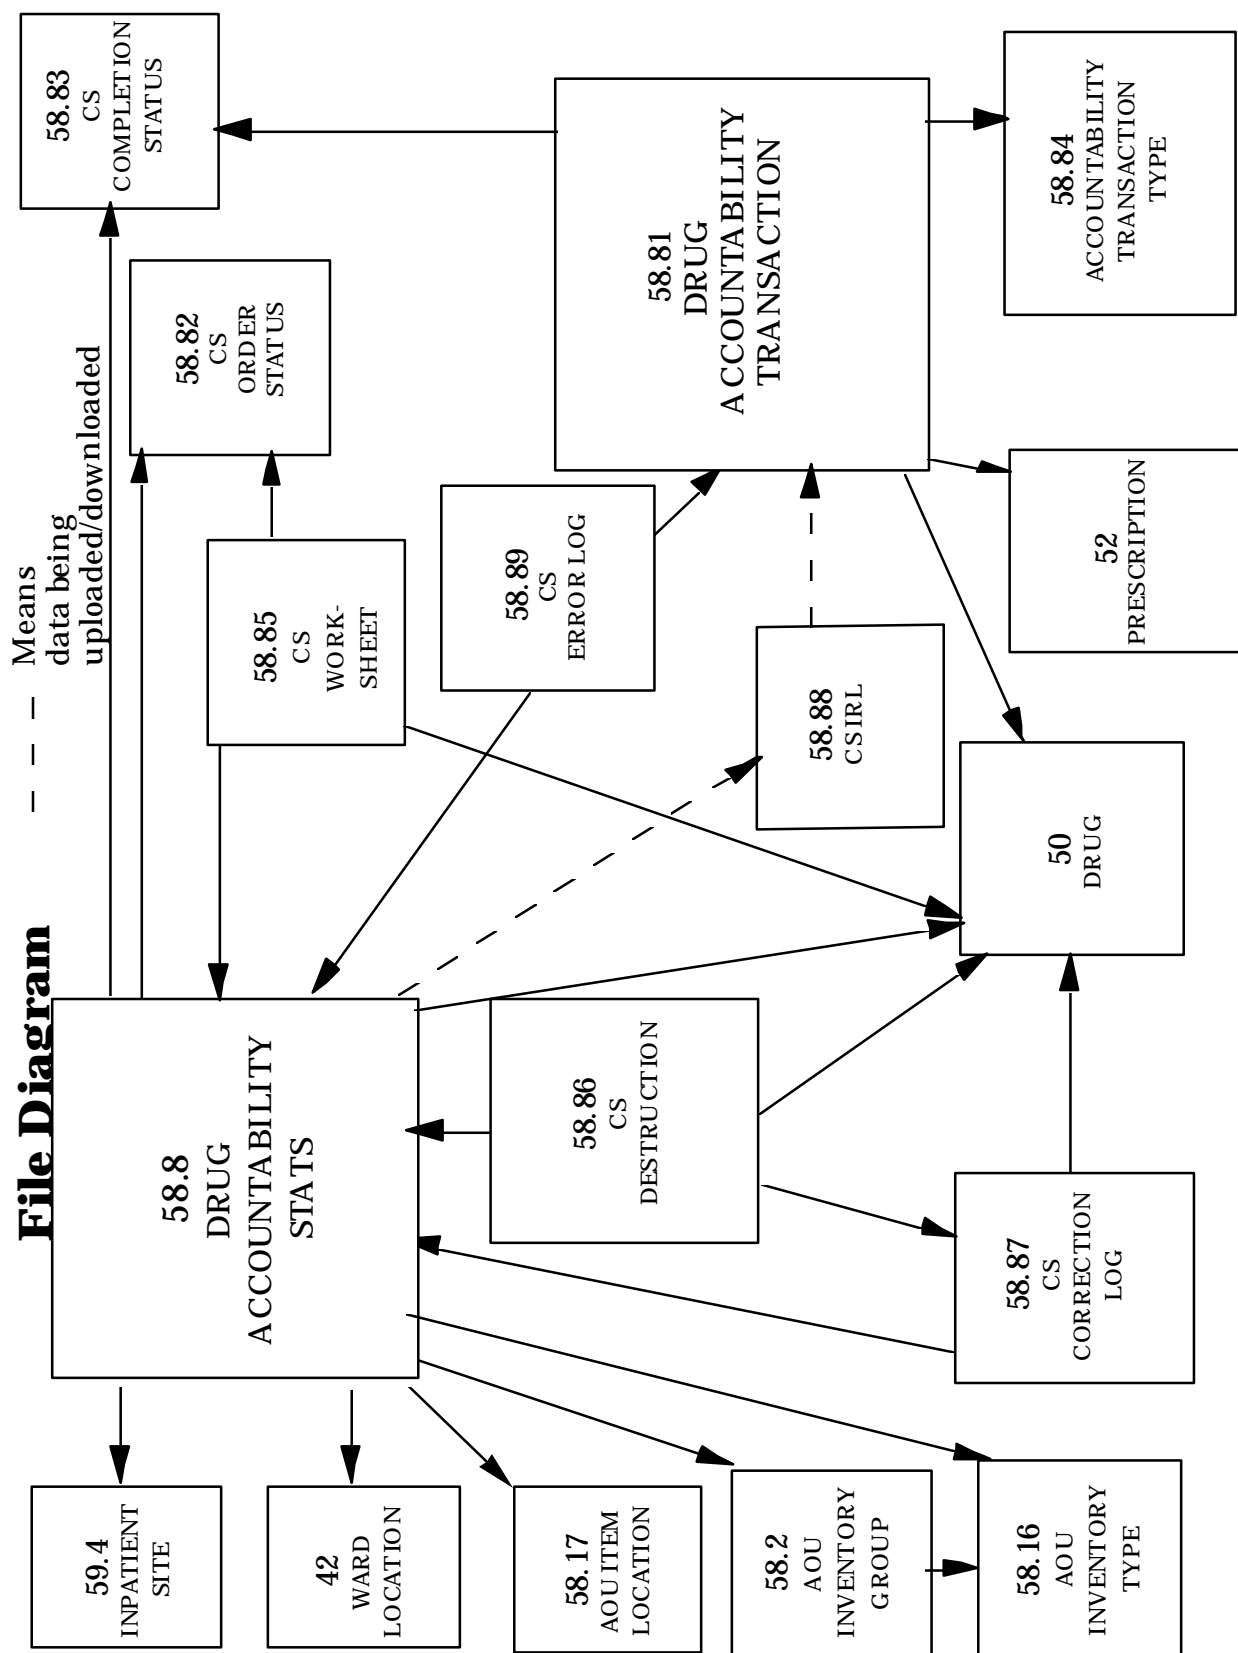

The *Set Up CS (Build Files) Menu* supports the management of files used during the initial set up of the Controlled Substances module. It includes the creating, editing, and listing of data in the CS files. Be forewarned that it takes a considerable amount of time and effort to set up this module. Numerous worksheets and diagrams are provided throughout the manual to assist you in this task.

The diagram on the following page points out the interrelationships of the Controlled Substances files.

First the Narcotic Area of Use (NAOU) Inventory Types, displayed by AOU INVENTORY TYPE file (58.16), should be defined.

Second the NAOU Drug Location Address Codes, represented in the AOU ITEM LOCATION file (#58.17), should be defined.

The DRUG ACCOUNTABILITY STATS file (#58.8) and the DRUG ACCOUNTABILITY TRANSACTION file (#58.81) contain inventory levels and a history of narcotic orders. These entries located within these files are pointed to by other files. Several fields within these files are linked to other files; Drug points to the generic drug name from the DRUG file (#50); Inpatient Site points to the INPATIENT SITE file (#59.4) and the Primary Dispensing Site represents a Master or Satellite Vault maintained within the DRUG ACCOUNTABILITY STAS file (#58.8).

Site Parameters

This includes selecting an inpatient site for Controlled Substances use and answering package specific questions concerning this site. This option is locked with the PSD PARAM key and is only given to the Pharmacy Package Coordinators using the CS software.

👉 **Note:** If you wish to change the inpatient site that you selected simply return to this option and answer NO to remove the site for selection.

Enter/Edit Menu ...

This menu contains the enter/edit options associated with setting up the files for the Controlled Substances module.

Mark/Unmark Drugs for Controlled Substances Use

This option is used to mark/unmark entries in the DRUG file (#50) for use with the Controlled Substances package. Every drug stocked within a Narcotic Area of Use **MUST** be marked for CS use.

Inventory Types - Enter/Edit

This option will enter and edit the entries in the AOU INVENTORY TYPE file (#58.16) used to classify Narcotic Area of Use drugs. The information must be filled in here before you can edit any other files due to the fact that other files refer to these entries.

Each NAOU can define there own type of Inventory. These can be as broad or narrow as needed. You might want to have inventory types such as oral solids, oral liquids and solution sets. You also might want to break it down further and inventory scheduled narcotics separately from each other, or even create multiple inventory types (e.g., Schedule II Narcotics and Schedule V Narcotics).

All of the inventory types are defined by the ward with one exception. The inventory type **ALL** should be a defined type in your existing AOU INVENTORY TYPE file. **ALL** is used when you wish to inventory all types on the same inventory sheet. Enter the name as **ALL**, with a description of **Used to select all types**.

Enter/Edit CS Drug Location Codes

This option is used to enter and edit the data for the location codes. These location codes identify the specific location of a drug in an NAOU or in the pharmacy. Up to three levels of coding are possible. For example, you could use the Medicine Room, Cabinet A, and Shelf 2 as the location area for one drug.

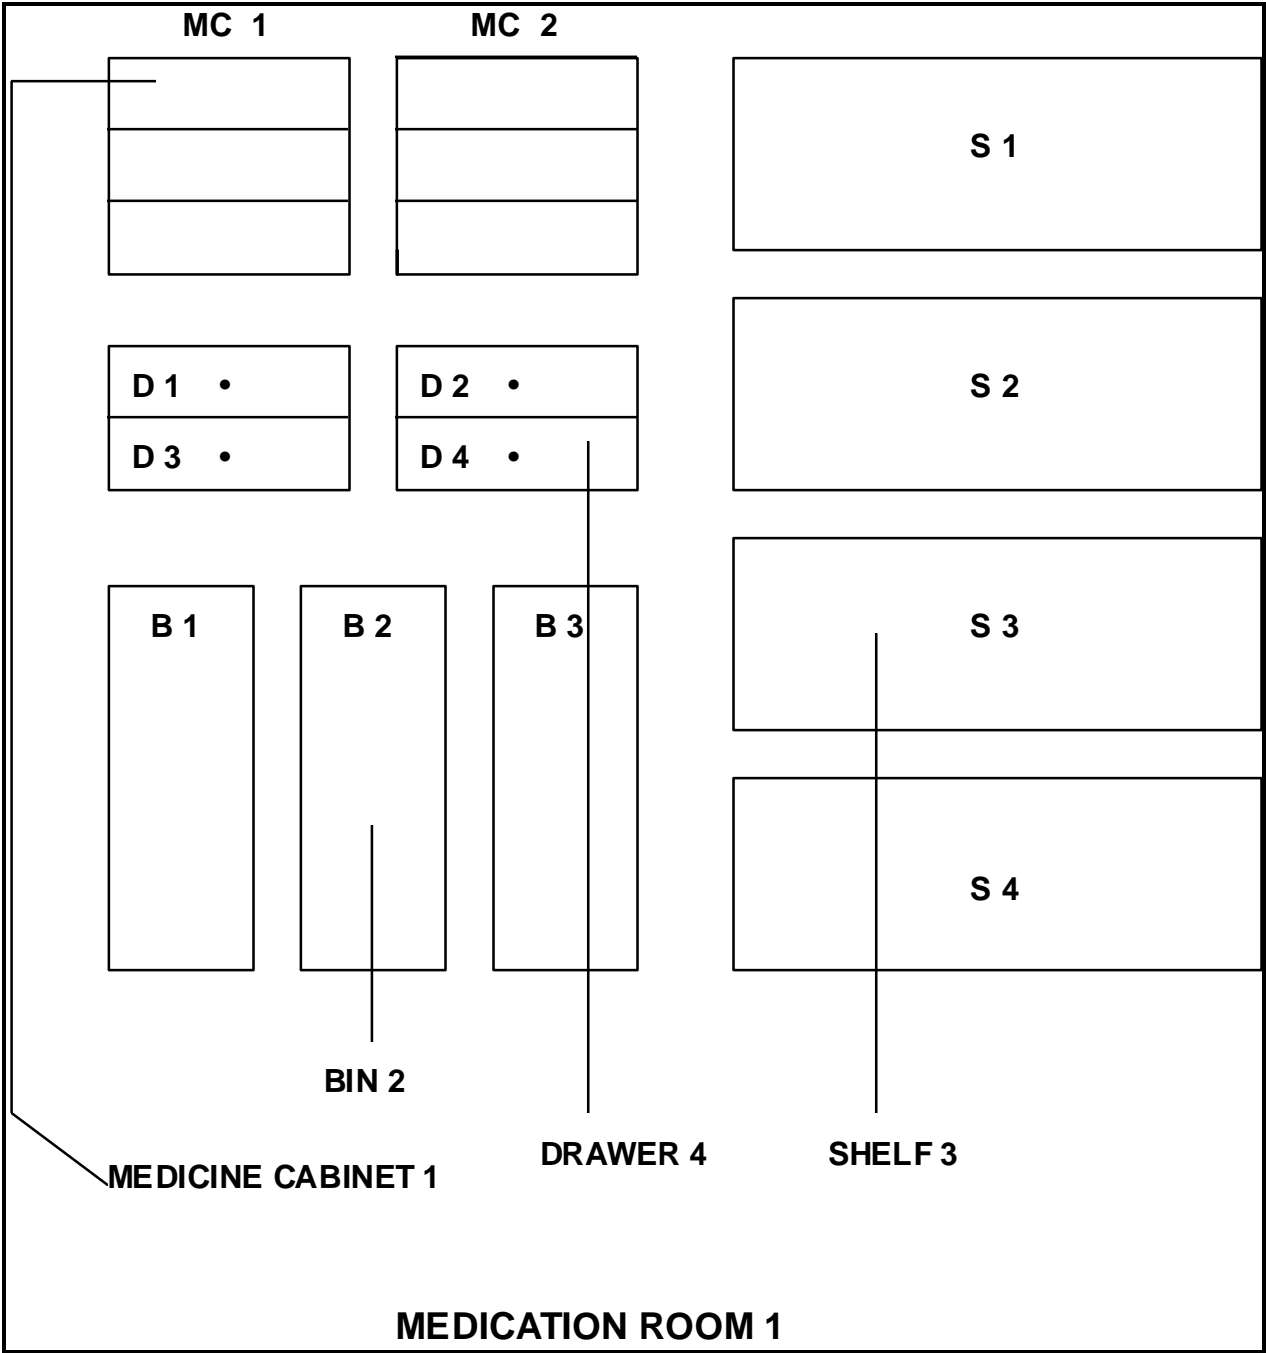

The following are examples of drug address codes and code expansions that a site might use.

<u>DRUG ADDRESS CODE</u>	<u>CODE EXPANSION</u>
MC1	Medicine Cabinet 1
MC2	Medicine Cabinet 2
CUR	Clean Utility Room
D1.....	Drawer 1
D2.....	Drawer 2
B1.....	Bin 1
B2.....	Bin 2
MR	Medicine Room
NC	Narcotics Cabinet
RA	Rack A
RB	Rack B
REF	Refrigerator
S1	Shelf 1
S2	Shelf 2

When implementing the Controlled Substances package, consider how to establish uniformity and consistency within all Narcotic Areas of Use, when possible. Determine a consistent way to code the locations and organize the Areas (e.g., always number or letter from left to right, top to bottom, or some other consistent fashion). This will help new employees locate drugs easier and check another employees' NAOUs during times of leave.

The following diagram illustrates how the drug address codes and expansions might be applied to a prototype NAOU. When drug address codes have been entered, a printout of the data can be made by using the *List CS Drug Location Codes* option.

DRUG ADDRESS CODE/EXPANSION

Create/Edit the Narcotic Area of Use

A Narcotic Area of Use (NAOU) is a place where commonly stocked drugs are stored for use by pharmacy, wards, or treatment areas. An NAOU can serve one or more wards or clinics. The purpose of this option is to create or edit the Narcotic Areas of Use.

If you want to create an NAOU under a different Inpatient Site than the one you chose when you signed-on, you must log off the computer and sign back on and select the new Inpatient Site.

Your Vaults should be created in the following order:

- (1) **Master Vault:** This will be your primary dispensing vault for pharmacy.
- (2) **Satellite Vault:** If it is needed create it next. This will be the secondary dispensing vault for pharmacy.
- (3) **Narcotic location:** An NAOU set up for the nursing wards, pharmacy IV room, or a pharmacy working stock area.

To set up File 58.8, DRUG ACCOUNTABILITY STATS file, data must be entered into the following fields using the *Create/Edit the Narcotic Area of Use* option:

“Select NAOU:”

Enter the name of the Narcotic Area of Use. This can represent a pharmacy narcotic vault, a pharmacy working stock area, a ward, a combination of wards, or, as in the case of cardiac cath lab, no ward.

“LOCATION TYPE:”

There are three types of Narcotic Areas of Use: 1) MASTER VAULT, 2) SATELLITE VAULT, and 3) NARCOTIC LOCATIONS. At this prompt you will answer **M** for Master vault, **S** for Satellite vault, or **N** for Narcotic location. Once an NAOU has been stocked with drugs, the location type cannot be changed, you can however transfer the information from a satellite vault to a master vault.

WORKSHEET FOR CREATING THE NARCOTIC AREA OF USE

NAOU NAME: _____

LOCATION TYPE: _____

Æ PRIMARY DISPENSING SITE: _____

† ASK MFG/LOT#/EXP. DATE?: _____

† AUTO GENERATE DISPENSING #'S?: _____

* LOW DISPENSING #: _____

* HIGH DISPENSING #: _____

* LAST DISPENSING #: _____

†PRINT GREEN SHEET: _____

†GREEN SHEET STOCK: _____

† = Will only appear if you are creating a Master or Satellite vault.

* = Will only appear if you answered yes to AUTO GENERATE DISPENSING #'S?

• = Will only appear if you are entering for a Narcotic location.

Æ = Will only appear if you are entering a Satellite vault or Narcotic location.

Stock CS Drugs - Enter/Edit

Using this option, you may enter or edit the list of drugs to be stocked in the Narcotic Area of Use; however, duplicate entries in this list will not be allowed. This is the most time consuming part of setting up the package. For your pharmacy vaults, you should begin by entering all drugs that will be dispensed from that Narcotic Area of Use. For the narcotic locations, you may wish to begin by entering all drugs that Nursing is accustomed to stocking for the NAOU. A worksheet for creating Stock CS Drugs is located on the following page.

The "Expiration Date:" prompt will accept prior years.

PHARMACY NAOU STOCK FILE WORKSHEET

Make copies of this worksheet to help determine inventory to be stocked in each NAOU. For each NAOU, list all drugs to be stocked.

NAOU: _____

DRUG: _____

LOCATION: _____

◆ WARD (FOR DRUG): _____

TYPE: _____

STOCK LEVEL: _____

REORDER LEVEL: _____

QUANTITY TO REORDER: _____

* BREAKDOWN UNIT: _____

* PACKAGE SIZE: _____

† MAXIMUM QUANTITY PER ORDER: _____

• MANUFACTURER: _____

• LOT #: _____

• EXPIRATION DATE: _____

NAOU: _____

DRUG: _____

LOCATION: _____

◆ WARD (FOR DRUG): _____

TYPE: _____

STOCK LEVEL: _____

REORDER LEVEL: _____

QUANTITY TO REORDER: _____

* BREAKDOWN UNIT: _____

* PACKAGE SIZE: _____

† MAXIMUM QUANTITY PER ORDER: _____

• MANUFACTURER: _____

• LOT #: _____

• EXPIRATION DATE: _____

* = Are required to be answered by the dispensing site.

• = Are optional when entering a Narcotic Location.

† = Only asked for Master or Satellite vault.

◆ = Will only be asked when entering a Narcotic Location (NAOU).

Manufacturer, Lot #, and Exp. Date - Enter/Edit

Use this option to edit the Manufacturer, Lot #, and Expiration date for stocked drugs in the DRUG ACCOUNTABILITY STATS file. The drug must first have been added through the *Stock CS Drugs-Enter/Edit* option. This field, when defined, will print on the Pharmacy Dispensing Report and displayed on the request order to pharmacy.

Narcotic Breakdown Unit/Package Size - Enter/Edit

By using this option the user can enter or edit narcotic breakdown unit and narcotic package size for stocked drugs in an active NAOU. The breakdown unit for a bottle of 50 Tylox would be capsule and the package size would be 50. The breakdown unit for a box of 10 vials of Morphine would be vials, and the package size would be 10. If you were dispensing liquids in ML, then the breakdown unit would be ML. If you dispense by bottle, then bottle would be the breakdown unit. Package size would depend on whether the breakdown unit was ML or bottle.

NAOU Inventory Group - Enter/Edit

An NAOU Inventory Group is defined by pharmacy to represent the Narcotic Areas of Uses which can be inventoried together as a group. By grouping the commonly inventoried NAOUs under an easy to remember group name, the elements of the inventory are established and do not have to be redefined every time the inventory is scheduled.

NAOU Inventory Groups may be established to reflect different variations at the VAMC, grouped as the following examples, on any combination of these:

- (1) location (i.e., Emergency Room, clinic, or ward)
- (2) time—when the inventory takes place (i.e., Monday Day Shift, M-W-F/Evenings)
- (3) category or types of drug to be inventoried (i.e., IV solutions & sets, bulk narcotics, or Schedule II)

You will be able to continue to select NAOUs. If you choose only one NAOU continue to press the enter key until you reach the main menu.

You can printout the data entered for your NAOU Inventory Groups by using the *Inventory Group List* option.

Ward (for Drug) Transfer

This option will allow the mass conversion for all drugs in a single NAOU, several NAOUs, or ^ALL NAOUs to be transferred from an old ward to a new ward. This capability was designed especially for situations such as the closing of a Ward for construction.

If you answer **yes** to queuing the transfer, you will be able to request the time you wish the transfer to occur and will then be notified by MailMan when the job is completed; if **no**, the computer will flash a message at that time confirming the transfer.

Add/Delete Ward (for Drug)

This option will allow a user to add or delete a ward (for drug) assignment for all stock drugs in one or more active NAOUs.

Inactivate NAOU

Inactive NAOUs will be excluded from Stock Drug Listings and other reports that are done on all NAOUs. An inactive NAOU will however be included on reports covering a period of time when the NAOU was still active.

Order entry requests will not be permitted for inactive NAOUs, however, editing drug data such as manufacturer, lot number, expiration date for all NAOUs, and narcotic packaging information for vaults will be allowed. Under these circumstances, the NAOU name will be displayed with an "***INACTIVE**" flag.

NAOUs are inactivated by entering a date that can be past, present, or future and are reactivated by deleting the inactivation date.

If you inactivate all stocked drugs within an NAOU, the drugs **must** be reentered in one at a time to be reactivated.

Inactivate NAOU Stock Drug

Use this option to inactivate a drug that is currently stocked in an NAOU. Drugs should not be deleted, but simply made inactive. Inactivated drugs will not be included on the inventory sheet or on the NAOU stock list.

When you want to reactivate an inactivated drug, you must use this option to delete the inactivation date therefore making it active again.

Transfer Stock Entries ...

This option is locked with the PSD TRAN key, and only the pharmacy supervisor(s) who maintain the narcotic vaults should be assigned this key.

The ability to “copy” stock entries is useful in at least three cases. **First**, for stations setting up CS (Build Files) initially, you could establish a Generic NAOU with standard drugs which will be stocked by all NAOUs. Using this transfer option, the drugs could then be copied into all areas. You would have to edit each drug in each NAOU to enter the stock level, type, ward (for drug), and location.

A **second** application might be for the creation of crash carts or after-hours dispensing machines with identical stock drugs, stock levels, and location codes. After an NAOU has been created, the transfer option could be used to clone all others.

A **third** use for this option would be for adding new drugs to a number of NAOUs. For example, if drugs recently approved by the FDA have been added to your formulary, you could add this drug (or group of drugs) to a selected group of Narcotic Areas of Use.

NAOU to NAOU Transfer Stock Entries

This option will “copy” the active stock entries from a selected Narcotic Area of Use into one or more selected NAOUs. As many as **10** NAOUs may be chosen for transfer at one time. You may transfer either drug name only, drug name/stock level/and location code, or drug name/stock level, location code, and inventory types. The copy process will not copy inactive drugs or duplicate entries. Thus, if an NAOU already contains Acetaminophen w/codeine 30MG TAB, and that item is in the Master NAOU, the drug will not be duplicated. The actual transfer takes place in a background job which is automatically queued. When the transfer is complete, you will be notified by a MailMan message.

AOU to NAOU Transfer Entries

This option will “copy” the active stock entries from a selected AR/WS Area of Use into one or more selected Controlled Substances Narcotic Areas of Use. As many as **10** NAOUs may be chosen for transfer at one time. You may transfer either the drug name only, the drug name/stock level/location code, or drug name/stock level/location code/and inventory types. The copy process will not copy inactive drugs or duplicate entries. Thus, if an NAOU already contains Acetaminophen w/codeine 30MG TAB, and that item is in the Master NAOU, the drug will not be duplicated. The actual transfer takes place in a background job which is queued automatically. When the transfer is complete, you will be notified by a MailMan message.

Sort NAOUs in Inventory Group

This option allows the user to change the order in which the NAOUs will sort within an inventory group. NAOUs should sort in the order that they will be visited but VA FileMan puts them in the order in which they were defined.

Print CS Set Up Lists ...

This option contains all reports or lists associated with setting up the files for the Controlled Substances module.

Drug File Stats for CS Drugs

All drugs marked for CS package use will print on this report and the data may be used when loading stock drugs into an NAOU.

Only the active Controlled Substances drugs will print.

🐾 **Note:** The AMIS and cost reports depend on accurate dispense unit and price per dispense unit information.

DEA Special Handling List

This report alphabetically lists the drug name, DEA Special Handling, and NDC data for all drugs within the DRUG file marked for Controlled Substances package use. This report will be helpful in researching drugs incorrectly marked for CS package use.

Print Inventory Types

This option will print the list of inventory types and type descriptions defined in File 58.16-AOU INVENTORY TYPE file. These types are used to classify the items in an NAOU for inventory purposes.

List CS Drug Location Codes

This report will list the codes and code extensions used to define the location of drugs stocked in Narcotic Areas of Use or in the pharmacy.

Show Narcotic Area of Use

This option allows the user to print the NAOUs, Location Type, and Primary Dispensing Site created in the *Create/Edit the Narcotic Area of Use* option.

Stock Drug Print (Stock Level and Location)

This report prints an alphabetic listing of all active drugs you have defined in the DRUG ACCOUNTABILITY STATS file (#58.8). This report lists NAOU, drug name, location, stock levels, all ward (for drug) assignments, and all inventory types.

Stock Drug List (Inventory Type and Location)

This report lists all active stocked drugs you have defined in the DRUG ACCOUNTABILITY STATS file (#58.8). This report can be sorted alphabetically or by inventory type/location/drug. The data includes NAOU, location, drug name, stock level, and reorder level. The report sorted by inventory type/location/drug will include the type as printed data. The report can be printed for a single, several, or all NAOUs.

Breakdown/Dispensing Unit Report

This report provides an alphabetic listing of all active drugs you have defined in the DRUG ACCOUNTABILITY STATS file (#58.8). This listing includes breakdown unit, package size, dispense unit, and price per dispense unit.

Inventory Group List (80 column)

This option prints a list of the currently defined NAOU inventory groups with their associated inventory types.

Manufacturer and Narcotic Information Report

This report prints an alphabetical listing of all ACTIVE drugs within an ACTIVE NAOU. This report lists NAOU, drug name, manufacturer, lot #, expiration date, narcotic breakdown unit, and narcotic package size. This report may be sorted alphabetically by NAOU, then drug name or drug name, then NAOU. The user may select one, several, or all NAOUs to print.

Check Stocked Drugs for CS Use

This option queues a background job to check all ACTIVE drugs stocked, within an ACTIVE NAOU, for use with the Controlled Substances package. If a stocked drug has been unmarked for CS use the drug will then be inactivated. At job completion a MailMan message will be sent listing any drug discrepancies.

Initialize Balance at Setup

This option will be used **at package initialization only**. It provides pharmacy a method of entering on-hand balances for Controlled Substances drugs stocked within their dispensing vaults. The drugs will be listed alphabetically, displaying narcotic breakdown and package size for each. This option should be used only when the Controlled Substances package is ready to be “turned on” for production use.

Management Reports...

This option contains all reports or lists associated with drug accountability for narcotics.

Orders Filled Not Delivered

This option generates a list of all Controlled Substances orders filled from the pharmacy dispensing site (vault) but not yet delivered to the NAOUs. A summary total sorted by drug is also generated.

Pending CS Orders by Dispensing Site

Pharmacy uses this option to list all pending Controlled Substances orders for a specific dispensing site.

Destructions Holding Report

This option will create a report that will only list the drugs that have been previously marked for destruction.

 **Note:** DO NOT PRINT THIS REPORT IF YOU HAVE NOT PREVIOUSLY MARKED THE DRUGS.

If you have not previously marked the drugs, the following information will help you determine which step you need to do before this report can be run. Each step will create a VA FORM 10-2321 Narcotic Dispensing/Receiving Report. When you have completed the step of your choice return to this option and print your report.

1. If you have a Green Sheet number, you will need to go to the Pharmacist Menu and select the *Complete Green Sheet* option. Enter the completion status as Turned in for destruction. The system will assign a destruction holding number.

 **Note:** The *Complete Green Sheet* option updates the Green Sheet status to Complete - Reviewed Turned in for destruction, the nursing records, the transaction history, and the DESTRUCTION file.

2. If you do not have a Green Sheet number, you will need to go to the Supervisor (CS) Menu and select the *Balance Adjustments* option. After answering the prompts the system will assign a destruction holding number.

👉 **Note:** The Balance Adjustments option updates the monthly adjustments, the transaction history, and the DESTRUCTION file. These drugs are actively stocked in the vault inventory.

3. If you don't know if the drug is stocked in vault, you will need to go to the *Supervisor (CS) Menu*, then the *Destructions Menu* and select the *Hold a CS Drug (No Inventory Update)* option. After answering the prompts the system will assign a destruction holding number for the drug name entered.

👉 **Note:** The *Hold a CS Drug (No Inventory Update)* option does not update your inventory balances, it only creates an entry in the DESTRUCTIONS file. DRUG file (#50) is searched for the drug name entered.

4. If the Drug is Non-VA issue (not in DRUG file), you will need to go to the *Supervisor (CS) Menu*, then the *Destructions Menu* and select the *Non-VA Drug Placed On Hold For Destruction* option. At the "DRUG ITEM" prompt you can enter information in a free text form. After answering the prompts the system will assign a destruction holding number.

👉 **Note:** The *Non-VA Drug Placed on Hold for Destruction* does not update your inventory balances because the drug is not in the DRUG file.

DEA Form 41 Destroyed Drugs Report

This report lists information on destroyed Controlled Substances that is required in completing the DEA FORM 41.

Destroyed Drugs Report

This report lists alphabetically by drug all destroyed controlled substances within a narcotic dispensing site, for a given period of time. Pharmacy supervisor certifying the destruction, quantity destroyed, and date destroyed are also included on this report. The report may be generated for a single drug, several drugs, or ALL drugs stocked within a specific dispensing site.

Edited Verified Orders Report

This report lists all verified orders that have been edited or cancelled within a specified date range. Data listed includes pharmacy dispensing # (Green Sheet #), date edited, drug, type of action (edited or cancelled), original quantity, new quantity, and name of the pharmacist. The manufacturer, lot #, or expiration date fields will also be listed if edited.

Green Sheet Transfer Between NAOUs Report

This report lists all Green Sheets transferred and received between NAOUs for a given date range. This report may be printed for a single NAOU, several NAOUs, or ALL NAOUs.

Transferred Green Sheets - Pending NAOU Receipt

This report lists all Green Sheets that have been transferred from an NAOU and are pending receipt in another NAOU.

Completed Green Sheet Discrepancy Report

This report lists all Green Sheets with a completion status of MATH ERROR, GREEN SHEET NOT SIGNED BY NURSE , or OTHER - REFERRED TO SUPERVISOR. This report may be printed for a single NAOU, several NAOUs, or ALL NAOUs.

Correction Log Report

This report lists all corrective actions logged for a Green Sheet for a selected date range. This report may be generated by order status changes or by Green Sheet deletions.

NAOU Usage Report

This report will print an NAOU drug usage report for a selected date range. The report may be sorted by drug (one, some, or ALL) or by NAOU (one, some, or ALL). A detailed list of orders, including the pharmacy dispensing # (Green Sheet #), date filled, quantity, and who ordered the drug will be printed. Summary totals by order and quantity are also generated.

AMIS Report

This option provides the pharmacy with AMIS report information by NAOU.

Cost Reports

This option provides pharmacy with the cost reporting data for Controlled Substances drugs, by NAOU, for a specified date range.

Listing of Green Sheet Log

This option numerically lists all Green Sheets for a given date range or for a given Green Sheet number range. The logs list Green Sheet number, date dispensed, and current status.

Under Inspector's Review - Green Sheets

This report lists all Green Sheets placed on hold for review by a Controlled Substances Inspector.

Balance Adjustment Report

Use this report to review adjustments that corrected the balance of a drug. Controlled Substances drugs that are deducted from the vaults on-hand balances using this option are drugs not dispensed with a VA FORM 10-3638 , drugs that have been returned to stock, drugs returned to the manufacturer, or drugs on hold for destruction.

Balance Adjustments

This option is used to review or enter adjustments needed to correct the on-hand balance of a drug. Controlled Substances drugs not dispensed with a VA FORM 10-2638 returned to stock, or returned to manufacturer and held for destruction are deducted from the vault on-hand amount using this option.

The numbers that appear in parenthesis at the "Enter adjustment quantity" prompt will start with a negative number (this is your current on-hand amount) and is the number that you can not exceed if you choose to subtract an amount. The next number 999999, this is the highest amount that you can add to the current on-hand amount. These two numbers are separated by a hyphen.

You will also be asked to give your Signature Code when using this option.

Example:

```
Select Supervisor (CS) Menu Option:  BALANCE Adjustments
Review? No//  <RET> NO
Select Dispensing Site: MAST VAU//  <RET>

Enter your Current Signature Code:  XXXXXX SIGNATURE VERIFIED

Select MAST VAU drug:  DIAZEPAM 5MG TAB
Current Balance: 1525                      Breakdown Unit: TAB

Enter adjustment quantity (with '-' if negative):  (-1525-999999):  -87

Please enter reason for adjustment:  ENTERED WRONG AMOUNT

OK to post? Yes//  <RET> YES

There were 1525 on hand.                      There are now 1438 on hand.

Updating monthly adjustments and transaction history.

To be destroyed? No//  <RET> NO

Select MAST VAU drug: <RET>
```

Destructions Menu ...

This menu allows pharmacy supervisors to maintain the necessary records when destroying a Controlled Substances drug.

Hold a CS Drug (No Inventory Update)

This option allows pharmacy supervisors to place a Controlled Substances VA drug, from the DRUG file (#50), on hold for destruction. When using this option, the Controlled Substances inventory balance will **not** be updated. A CS DESTRUCTION file (#58.86) entry is now able to be traced through the CS software.

Non-VA Drug Placed on Hold for Destruction

This option allows the pharmacy supervisors to place a non-VA drug, not existing in the DRUG file (#50), on hold for destruction. A CS DESTRUCTION file (#58.86) entry is made and is now able to be traced through the CS software.

Destroy a Controlled Substances Drug

This option provides the supervisor with the ability to enter the destruction information for any Controlled Substances drug being destroyed.

Add Existing Green Sheets at Setup

This option provides pharmacy the ability to enter existing Green Sheets and active orders on an NAOU, at package setup. These orders may be tracked through the Controlled Substances software.

Correction Menu ...

This menu option gives the pharmacy supervisor access to make corrective actions on Controlled Substances orders.

Sometimes nursing may in error flag a Green Sheet ready for pharmacy pickup. Using this option, the pharmacy supervisor may change the Green Sheet order status from COMPLETED - GREEN SHEET READY FOR PICKUP to DELIVERED - ACTIVELY ON NAOU to correct this problem.

The CS software allows pharmacy to add existing Green Sheets, active orders on an NAOU, at package setup. These orders may be tracked using the CS software. Sometimes one of these existing Green Sheets may be incorrectly entered in the software. Using this option, the pharmacy supervisor may delete this erroneous existing Green Sheet.

An entry in the CS CORRECTION LOG file (#58.87) will be created to log a history of all corrective actions.

Edit/Cancel Verified Orders

This option gives the pharmacy supervisor access to edit or cancel a verified order. The order must be edited or cancelled prior to being delivered to the NAOU. A verified order may be edited only **once**. It must be cancelled and re-entered if a second edit is required. Quantity, manufacturer, lot number, and expiration date are the only fields in which edits can be made.

Correct Order Status - GS Ready for Pickup

This option gives the pharmacy supervisor access to correct the order status of certain CS orders. Sometimes nursing may in error flag a Green Sheet ready for pharmacy pickup. Using this option, the pharmacy supervisor may change the Green Sheet order status from COMPLETED - GREEN SHEET READY FOR PICKUP to DELIVERED - ACTIVELY ON NAOU to correct this problem. An entry in the CS CORRECTION LOG file (#58.87) will be created to log a history of all corrective actions.

Existing Green Sheets Correction

This option gives the pharmacy supervisor access to delete Green Sheets that were added using the *Add Existing Green Sheets* option. An entry in the CS CORRECTION LOG file (#58.87) will be created to log a history of all corrections.

Error on Completed Green Sheets

This option allows the Pharmacy Supervisor to correct the completed status of a Green Sheet from COMPLETED - REVIEWED to COMPLETED - PENDING PROBLEM RESOLUTION. An entry in the CS CORRECTION LOG file (#58.87) will be created to track this error.

List Pending Errors/Adjustments Logged by TRAKKER

This option lists all pending errors/adjustments logged from the barcode TRAKKER for a specific Dispensing Site within a given time frame.

Enter Error/Adjustment Resolution

This option gives designated pharmacy supervisors the ability to enter a resolution comment for each error or adjustment created when using the barcode TRAKKER.

Print Resolved Errors/Adjustments Log

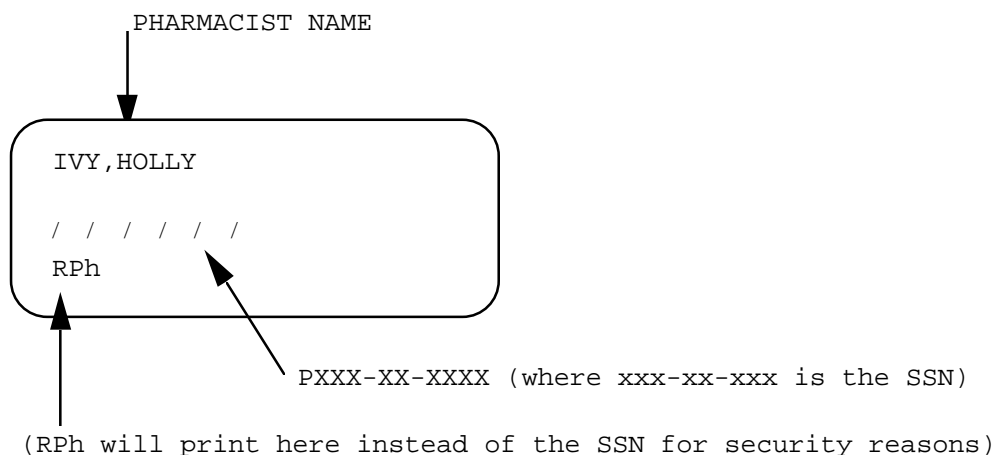

This report prints a listing of all resolved errors/adjustments logged by the barcode TRAKKER for a specific Dispensing Site within a given time frame.

Print Pharmacist ID Labels

This option enables holders of the PSDMGR security key, usually pharmacy supervisors, to print the pharmacists barcoded ID labels.

These barcode ID labels will identify the Controlled Substances pharmacists using the TRAKKER to perform narcotic vault inventories. The pharmacist is identified by SSN within the barcode but RPh will be displayed on the label for security purposes.

The following format is used when printing pharmacists ID labels:

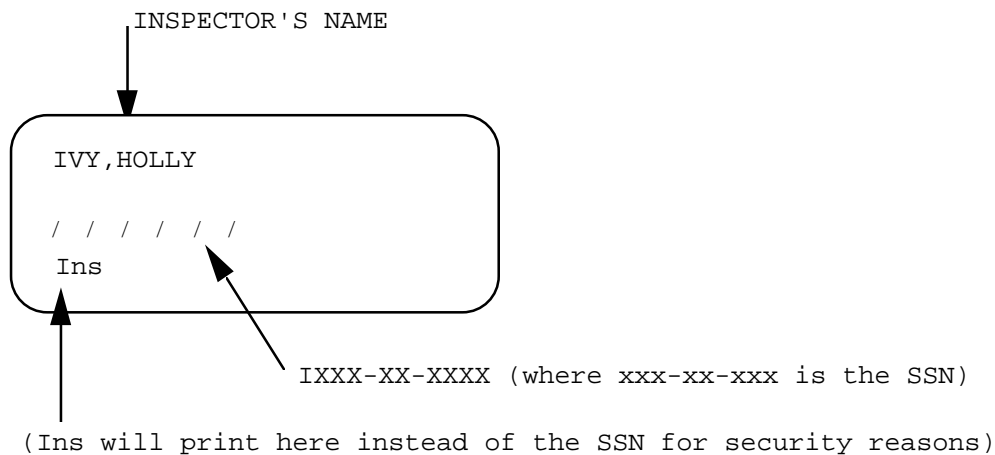

The recommended labels are Avery #5160, 1" x 2 5/8". These labels print 3 rows across and 10 columns down for a total of 30 labels per sheet.

Inspectors Label Print

This option allows narcotic inspectors and pharmacy supervisors to print the inspectors barcoded ID labels.

These barcode ID labels will identify the Controlled Substances inspector using the TRAKKER to perform narcotic vault inspections. The narcotic inspector is identified by SSN within the barcode but Ins will be displayed on the label for security purposes.

The following format is used when printing inspectors ID labels:

The recommended labels are Avery #5160, 1" x 2 5/8". These labels print 3 rows across and 10 columns down for a total of 30 labels per sheet.

Unscheduled Order Report

A report to show by drug or by NAOU a list of unscheduled orders.

Production Reports

Pharmacy uses the production reports to maintain Controlled Substances drug accountability and proper inventory controls. Reports generated in lieu of VA FORM 10-2321 and VA FORM 10-2638 may be generated from this menu.

Pending CS Orders by Dispensing Site

Pharmacy uses this option to list all pending Controlled Substances orders or a specific dispensing site.

Orders Filled Not Delivered

This option generates a list of all Controlled Substances orders filled from the pharmacy dispensing site (vault) but not yet delivered to the NAOUs. A summary total sorted by drug is also generated.

Inspector's Log for Controlled Substances

This report lists all active Green Sheets by Narcotic Area of Use. The data includes Green Sheet number, drug name, date dispensed, quantity dispensed expiration date (if available), blanks for quantity on hand, and a signature blank for verification.

Inspector's Log by Rec'd Date

This report lists all dispensing transactions for Narcotic Area of Use received within a given date range. The data includes dispensing number, drug name, date received, quantity received, expiration date (if available), blanks for quantity on hand, and a signature blank for verification.

Stock Drug Print (Stock Level and Location)

This report prints an alphabetic listing of all active drugs you have defined in the DRUG ACCOUNTABILITY STATS file (#58.8). This report lists NAOU, drug name, location, stock levels, all ward (for drug) assignments, and all inventory types.

Green Sheet Ready for Pickup Log

This report lists all Green Sheets ready on the wards to be picked up by pharmacy. This report requires a signature of the pharmacy employee picking up the Green Sheet and a signature of the nurse releasing the Green Sheet. This document will be retained on the ward for nursing's records.

GS Picked Up Awaiting Pharmacy Review

This report lists all Green Sheets picked up by pharmacy but still awaiting a pharmacy review.

Pharmacy Dispensing Report

This report lists by dispensing site and date range the drug name, pharmacy dispensing number (Green Sheet #), quantity dispensed, date dispensed, and dispensing pharmacist. Also there's a summary by drug of total number dispensed. The summary may be generated without the individual dispensing data.

Daily Activity Log (in lieu of VA FORM 10-2320)

The Daily Activity Log lists all transactions for a Controlled Substances dispensing site (vault). It includes a forwarding balance on each transaction. This document may be generated for a single drug, some drugs, or ALL drugs within a specified date range.

Transfer Drugs between Dispensing Sites Report

This report displays all transactions which transferred Controlled Substances between dispensing sites, for a given period of time. The transactions list within dispensing site, by drug, the date/time transferred, quantity transferred, and pharmacist transferring the drug.

Green Sheet History

The Green Sheet history provides pharmacy with a detailed account of every transaction affecting this VA FORM 10-2638 . This history may be displayed to the user's screen or directed to a printer.

Expiration Date Report

This option will print a Controlled Substances Expiration Date Report for a single NAOU, several NAOUs, or ALL NAOUs. This report may be sorted by DATE/DRUG/NAOU or by DATE/NAOU/DRUG.

Inventory Sheet Print

This option prints an Inspector's Sheet which is used to inventory on-hand amounts within a pharmacy dispensing site (vault). This form lists current on-hand amounts and provides a blank space for the inspector to list actual on-hand counts. A signature line is included on each page. This sheet may be generated for one drug, some drugs, or ALL drugs. The drugs are listed alphabetically.

List On-Hand Amounts

This option lists current on-hand amounts for drugs stocked in a pharmacy dispensing site (vault). The drugs may be selected by one, some, or ALL. The drugs are listed alphabetically to the user's screen or a selected printer.

Rx (Prescription) Outpatient Dispensing Report

A report sorted by drug, prescription number, or inventory type for a date range of outpatient dispensing.

Glossary

Action Prompt

There are two action prompts that occur during the pharmacy dispensing process. The action codes used with these prompts will appear in (). The following codes are valid:

- V** Verify or Dispense the order (Displayed only to the dispensing pharmacist).
- P** Process or Fill the order (Displayed only to the pharmacy technician or pharmacist filling but not dispensing the order).
- DC** Cancel the order.
- E** Edit the order.
- B** Bypass the order.
- S** Show the order.

Completion Status

A review status is attached to each Controlled Substances Green Sheet returned to pharmacy. The following are valid:

NO DISCREPANCY—No discrepancy found.

TURN IN FOR DESTRUCTION—CS drug turned in to be destroyed.

RETURNED TO STOCK—CS Drug returned to stock. The dispensing site inventory balance will be updated.

MATH ERROR—CS drug discrepancy found.

GREEN SHEET NOT SIGNED BY NURSE—GS missing nurse's signature.

OTHER—REFERRED TO PHARMACY SUPERVISOR—CS drug discrepancy referred to supervisor for resolution.

Daily Activity Log

The Daily Activity Log lists data, within a selected date range, associated with the VA FORM 2320 for a dispensing site.

Dispensing Number	Control number assigned by pharmacy when dispensing a Controlled Substances drug. This number is used to track the Green Sheet and drug. Also referred to as the Disp #, Green Sheet #, GS #, or transaction # throughout the CS package.
Dispensing/Receiving Report (in lieu of VA Form 10-2321)	This report can be printed in lieu of VA Form 2321 and lists all Controlled Substances orders dispensed to an NAOU. The signatures of the dispensing pharmacist and the nurse receiving the drug are required.
Dispensing Site	An NAOU set up as a pharmacy vault that dispenses Controlled Substances drugs.
Dispensing Worksheet	This worksheet compiles a list of all pending Controlled Substances request orders for a selected dispensing site. A worksheet number, drug name, quantity ordered, requesting NAOU, ordered by, comments, and blanks for pharmacy dispensing number, manufacturer, lot number, and expiration date are listed on the worksheet.
Drug Address Code (Location Code)	A code that represents the location of a drug in the NAOU. For example, if TYLOX is stored in an NAOU on the second set of shelves, third shelf from the top, its drug address code could be expressed as S,2,3. The address code can consist of up to three levels separated by a comma. Each level should further define the exact location. The code is associated with an expansion code for clarity.
Drug Address Code Expansion	Text used to clarify the meaning of a drug address code. For example, the code S would be expanded and printed as shelf. (These codes and expansions are locally created terms.)
Green Sheet	The CONTROLLED SUBSTANCE ADMINISTRATION RECORD (VA Form 10-2638) is referred to as a Green Sheet or GS throughout the CS package. Pharmacy dispensing number, drug name, expiration date, quantity dispensed, lot number, ordered by, dispensed by, and ward (NAOU) are printed on the form.

Green Sheet number	Control number assigned by pharmacy when dispensing a Controlled Substances drug. Th is number is used to track the Green Sheet and drug. It is also referred to as the GS #, dispensing #, or disp #, or transaction # throughout the CS package.
Inpatient Site	Inpatient Site must be defined for each NAOU. The Controlled Substances software utilizes this data to distinguish multi-divisional sites.
Inspector's Log	This report lists all active Green Sheets by NAOU. It includes the following information: Green Sheet #, drug name, date dispensed, quantity dispensed, expiration date (if available), blanks for quantity on hand, and a signature blank for verification.
Interactive Reader Language (IRL)	The Interactive Reader Language (IRL) is a language used to write programs on barcode readers that allow the readers to interact with the user.
Intranet	A company wide computer network available via modem that connects users.
Master Vault	An NAOU set up as your primary dispensing site.
NAOU - Narcotic Area of Use	A Narcotic Area of Use (NAOU) is a place where commonly stocked Controlled Substances drugs are stored for use by pharmacy, wards or treatment areas. There are three types of NAOUs: 1) Master Vault, 2) Satellite Vault, and 3) Narcotic Locations.
NAOU Inventory Group	An NAOU Inventory Group is defined by pharmacy to represent the Narcotic Areas of Use which are inventoried together as a group. By grouping the commonly inventoried NAOUs under an easy to remember group name, the elements of the inventory are established, and do not have to be redefined every time an inventory is scheduled.
Narcotic Location	An NAOU set up for the nursing wards, pharmacy IV room, or a pharmacy working stock area.

Order Status

A processing status is attached to each Controlled Substances request order. The following are valid:

REQUESTED—NOT ORDERED

Requests created by batch processing but not yet approved.

ORDERED—NOT PROCESSED

Ordered by nursing but not processed by pharmacy.

PROCESSED—NOT DISPENSED Processed (filled) by pharmacy but not yet dispensed.

FILLED—NOT DELIVERED Dispensed and verified by pharmacy but not delivered to the requesting NAOU.

DELIVERED—ACTIVELY ON NAOU Drug stored on the NAOU.

COMPLETED—GREEN SHEET READY FOR PICKUP Nursing has flagged the Green Sheet ready for pharmacy pickup.

COMPLETED—GREEN SHEET PICKED UP Green Sheet returned to pharmacy but not yet reviewed.

COMPLETED—REVIEWED Pharmacy has reviewed the Green Sheet .

COMPLETED—PENDING PROBLEM RESOLUTION Pharmacy has reviewed the Green Sheet and a problem exists

CANCELLED Order cancelled.

TRANSFERRED TO ANOTHER NAOU Order and drug transferred to another NAOU.

UNDER REVIEW BY INSPECTOR Order and drug pulled from NAOU by CS Inspector for review.

LOGGED BY TRAKKER All drug doses from this order have been logged out to patients using the TRAKKER. (Not currently used in Version 2.0.)

PSD ERROR	This key should be allocated to pharmacy supervisors responsible for maintaining the narcotic vault. This key controls access to reports listing various error and exception conditions generated when entries are filed from the barcode TRAKKER. Also, the holders of this key will receive electronic mail messages created by using the TRAKKER.
PSD NURSE	This key should be allocated to nurses, usually LPNs, who may only receive and administer controlled substances but cannot place the order requests.
PSD PARAM	This key should be allocated only to the Inpatient Pharmacy Package Coordinator(s). This lock controls the printing of the Green Sheet s and the range of automated dispensing numbers for a dispensing site (vault).
PSD TRAN	This key should be allocated to the Inpatient Pharmacy Coordinator(s). This key controls the access to the Transfer NAOU Stock Entries option. Users can copy stock entries from one NAOU into another NAOU or from an AR/WS AOU into an NAOU.
PSDMGR	This key should be allocated to the Inpatient Pharmacy Package Coordinator(s) or his/her designee. This lock controls the editing of CS files for package set up. This key locks the Supervisor's Menu options [PSD MGR].
PSJ PHARM TECH	This key should be allocated to pharmacy technicians handling narcotic orders.
PSJ RNURSE	This key should be allocated to nurses who request narcotic orders, receive, and administer controlled substances on the wards.
PSJ RPHARM	This key should be given to pharmacists dispensing and receiving narcotic orders.

Satellite Vault	An NAOU set up as a secondary dispensing site.
Stock Drug	A drug (from the DRUG file) stored in an NAOU.
Stock Level	The quantity of a drug stocked in a specific NAOU.
TRAKKER	A barcode collection system utilized by scanning barcode labels or by pressing the key pad on the barcode reader device.
VistA	Veterans Health Information Systems and Technology Architecture
Ward (for Drug)	The name of the ward or wards that will use this particular drug. It is important to accurately answer this prompt because this is the link between the Unit Dose package and the Controlled Substances package. The Unit Dose package looks at this field to know if the drug is a Controlled Substances stocked drug.
